textbook of human development a lifespan development approach

a classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human

development in departments of psychology and human development this volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives since the publication of the second edition developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis as a consequence a developmental systems orientation frames the presentation in this edition this new edition has been expanded substantially in comparison to the second edition special features include a separate chapter focuses on the historical roots of concepts and theories of human development on philosophical models of development and on developmental contextualism two new chapters surrounding the discussion of developmental contextualism one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories life span life course bioecological and action theoretical ones are presented a new chapter on cognition and development is included contrasting systems approaches to cognitive development with neo nativist perspectives a more differentiated treatment of nature oriented theories of development is provided there are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of konrad lorenz and a new chapter on sociobiology a new chapter concentrates on applied developmental science

key human development theories that continue to guide research and practice are examined in this engaging text ten key theories are grouped into three families those that emphasize biological systems environmental factors and those that reflect an interaction between the two this organization enhances students ability to evaluate compare and contrast theories both within and across families each family is introduced with an overview of their unique perspectives and the rationale for grouping them together discussion of each theory includes the cultural historical context during the theory s development its key concepts and ideas extensions of the theory in contemporary work an example showing a modification of the theory an application of how the theory is used to inform practice and an analysis of how the theory answers 6 basic questions that a human development theory should address each chapter includes an overview of the strengths and weaknesses of the theories to facilitate comparisons theories that have a clear lifespan focus along with cases and examples that address issues across the lifespan are included the second edition features a new chapter on bioecological theory that highlights the increased use of this theory in the development of family school and community intervention programs a new epilogue that examines the same case via each of the ten theories illustrating their similarities and differences and how these ideas cast a unique light on a common situation new opening cases that bring theory to life along with narrative that links the case to the chapter s concepts guiding questions that help students compare theoretical perspectives critical thinking questions that focus on using

the theory to interpret the case and personal life experiences and recommended resources that extend students understanding more examples from various disciplines that address topics students are likely to encounter as professionals a new glossary that defines the boldfaced key terms enhanced website at psyppress.com 9781848726673 that provides instructors with a test bank power points discussion questions and activities additional cases with questions teaching notes for using the book with various types of majors and a conversion guide outlining changes to the new edition and students with key terms with hot links to their definitions chapter summaries and outlines and additional resources for further study updated research and applications highlight the latest scientific developments ideal for advanced undergraduate or beginning graduate courses in theories of development lifespan or child development taught in psychology human development family studies education and social work

pathways of human development uses theoretical perspectives from developmental social and behavioral sciences to examine the many ways that individuals families and communities intersect and interface focusing on the impact of change on human development including its antecedents processes and consequences the chapters examine a range of topics such as health and adaptation social anxiety disorder protective factors and risk behaviors parent child relationships adolescent sexuality intergenerational relationships family stress and adaptation and community resilience by extending human development theorizing across these pivotal life changing issues this volume offers a comprehensive map of the trajectories of development among individuals families and communities

this text is intended for freshman sophomore level introductory courses in life span human development and life span developmental psychology drawing from many disciplines to provide a contemporary presentation of the key questions topics and controversies in life span development this text takes a chronological approach to human development it focuses on context and culture while illustrating that the status of human development is inextricably embedded in a study of complex and changing cultures maintaining an open ended perspective throughout the text encompasses many different and opposing views and aims to encourage students through their study to develop an informed point of view

the cultural nature of human development presents an account of human development that looks at both the differences and similarities among cultures beyond demonstrating that culture matters rogooff focuses on how culture matters in human development what patterns help make sense of the cultural aspects of human development rogooff integrates research and theory from several disciplines including cross cultural psychology sociocultural research linguistic and psychological anthropology and history the volume examines multiple aspects of development including childrearing gender differences interdependence and autonomy developmental transitions maternal attachment parental discipline and

cognition and culture this important new work will appeal to psychologists educators and anthropologists

the book is well written and the theorists and their respective work are well presented and clearly explained as a text dealing with the historical overview of major theorists and their work in human development over the last century or so it is extremely strong and could be widely used in a variety of both undergraduate and graduate courses ann c diver stamnes humboldt state university in general i found the websites and references listed at the end of each chapter to be very interesting and useful for taking students beyond what is in the text jane leedingham university of ottawa a fine choice for a classic theories course and i believe that the level of presentation would be appropriate for advanced undergraduate or graduate students the up to date web sites at the end of each section are a definite plus the choice of sites is excellent cosby steele rogers virginia tech an introduction to theories of human development examines the development process looking at the series of changes that occur as a result of an interaction between biological and environmental factors why might our behavior as an adult be so different from when we were infants why and how does one stage of development follow the next are the changes that we experience abrupt in nature or smooth and predictable author neil j salkind reflects on such critical questions to help readers understand what happens along the way as one develops from infancy through later life this book provides a comprehensive view of the primary theoretical models of human development including those from the biological psychoanalytic behavioral and cognitive developmental perspectives along with a brief discussion of a historical background for each of these approaches an introduction to theories of human development examines the application of these theories to various aspects of human development such as the effectiveness of early intervention individual differences adolescence and sociobiology features of this text a final integrative chapter compares the various theories presented in the book using murry sidman s model of six criteria for judging a theory to help develop students skills for critically assessing theory classic approaches to understanding human behavior across the lifespan are also examined pedagogical features such as chapter opening quotes boxed highlights key terms a glossary and websites for further reading enhance student understanding of everyday human behavior an introduction to theories of human development is an accessible text for advanced undergraduate students in the social and behavioral sciences including such fields as psychology education human services nursing sociology social welfare and human development and family studies

intended as supplemental reading in courses on theories of development this book augments traditional core texts by providing students with more depth on about two dozen recent and emerging theories that have appeared over the past 20 years this period has seen a decline of the traditional grand theories that attempt to apply to all people all the time in favor of micro theories that focus more on

individual differences so a book like this actually points the way toward the future rather than dryly reviewing the past in addition the author inspects the changing ways in which the concept of theory itself has been interpreted during this period and he concludes with a chapter suggesting future directions

how malleable is human nature can an individual really change in meaningful ways or are there immutable limits on the possibilities of human growth set in place by genes and early childhood experiences these questions touch our deepest political and personal concerns and have long been a matter of fierce debate in the behavioral sciences

a practically focused guide to effective counseling of all clients human development across the life span is a practical guide to human growth and development moving beyond theory to include real world applications for counselors who work with clients written by recognized authorities in mental health counseling and counselor education this book is fully aligned with the american counseling association's accreditation standards and includes contributions by well known and respected academics and practitioners based on an extensive review of course syllabi across cacrep accredited programs this book is organized to follow the way courses are typically taught and follows a consistent structure including pedagogical elements that help students learn after a thorough examination of essential concepts and theories of life span development the book moves through each stage of human growth and development to provide expert insight short case studies and practical applications to counseling the full instructor's package provides a useful set of tools including a respondent test bank powerpoint slides and an instructor's manual this book is the only text on human growth and development that emphasizes the key implications and applications for counselors providing useful information and the insights of real experts in each subject area understand the developmental milestones at each life stage appreciate clients' perspectives to better facilitate appropriate interventions work more effectively with clients of any age from toddlers to seniors tailor your approach to meet the unique needs and abilities of each life stage as a counselor you cannot approach a child's therapy the same way you approach an adult's even within each major category each developmental stage includes a nuanced set of characteristics that considered appropriately will inform a more effective treatment plan human development across the life span is a comprehensive guide to understanding all of your clients and providing the type of counseling that facilitates more positive outcomes

**publisher description**

life the essentials of human development is a brief account of human development that illustrates how psychological concepts apply to everyday life while exposing students to the role that culture and diversity play throughout the lifespan

provides a new approach to the psychology of human development by integrating psychological and philosophical insights on human virtue and authentic selfhood presents erikson s contributions within the more general care structure described by heidegger as the central structure of human existence the major effect of this broader understanding is to give new meaning to erikson s schedule of virtues to see them as the central structures organizing the themes and experiences of specific stages of development

a comprehensive systematic account of human development which is sensitive to the needs interests and ecologies of nonwestern cultures and individuals is provided in this unique volume the importance and value of the sociocultural milieu in shaping the growth and development of children is emphasized and the author asserts throughout that children do not grow and develop according to the same patterns regardless of culture the author describes developmental psychology from the perspective of west africa demonstrating how the local ecology and the resulting cultural ideology lead to differing ways in which children are conceptualized and socialized and in turn how they develop while much of his case material is from

it is more important than ever for students to have knowledge of the wider world through current research and examples from around the world arnett s human development teaches students to think culturally about their own development and see how it applies to their own lives and future careers whether they travel the globe or remain in their home towns in a culturally diverse and globalized world students will benefit from being able to think culturally about human development each stage of development covers physical cognitive and emotional and social development publisher
